-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Claims 1-8 and 16 are drawn to are, classified in class 705, subclass 35.
2. Claims 9-15, drawn to a system, classified in class 705, subclass 40.
3. Claims 17-27 are, drawn to a method, classified in class 705, subclass 42.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions II and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be carried out via an electronic medium.
2. Inventions i and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in conjunction with a revolving credit line.
3. During a telephone conversation with counsel on March 05, 2005 a provisional election was made without traverse to prosecute the invention of group III , claims 17-27. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-16 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 17-27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Statutory method claims must be sufficiently tied to the technological arts. Sufficient ties require that the body of the claims include technology in a nontrivial manner.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 17-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dictionary of Business Terms.

The reference teaches a line credit and a loan. The examiner takes official notice that the features directed to the claimed line of credit are well known. Moreover, conventional lines of credits inherently possess these features. The reference fails to expressly teach of determining and requesting a single payment for the loan and line of credit. It would have been obvious for one skilled in the art at the time to have consolidated the payments of the two loan products into a single monthly payment as

motivated by the need to simplify the repayment. The examiner takes official notice that it is routine in the art of finance to consolidate loans into a single payment.
